

More importantly our harnesses are tested with our system to ensure compatibility and users safety.

During ascent or descent, the guided type fall arrester is connected to the external anchorage point; for work at height the connecting device is attached to the front or rear anchorage point.

<p>art. SKPI 2000</p>		<p>Full body harness with 2 attachment points: 1 front, 1 back</p>	<p>Suitable only to descend/ascend</p>	<p>CE EN 361</p>
<p>art. SKPI 5000</p>		<p>Full body harness with 5 attachment points: 2 front, 1 back, 2 side</p>	<p>Suitable to descend/ascend and to work in suspension with laynard for positioning (provided with harness)</p>	<p>CE EN 358 EN 361 EN 813</p>
