

art. SKRL

Guided type fall arrester device for rigid anchor line CE, compliant with norm EN 353-1.

(Light-weight) fall arrester provided with (double) action locking hook, swivel shackle and guide system. It runs along the anchor line and follows the user as he moves up and down the system without the need of manual adjustments while changing position during climbing/descending and it locks instantly on the anchor line in the event of a fall.

An energy absorbing element (EN 355) reducing the shock load can be incorporated in the arrester device itself, in the safety lanyard or in the anchor line.
